

ISRAEL JOURNAL OF MATHEMATICS

TABLE OF CONTENTS, VOLUME 109, 1999

ANDROULAKIS, G. AND E. ODELL	<i>Distorting mixed Tsirelson spaces</i>	125
BARIBAUD, C. M.	<i>Closed geodesics on pairs of pants</i>	339
BEALS, R.	See D. N. ROCKMORE	
BEGUN, B.	<i>A remark on almost extensions of Lipschitz functions</i>	151
CHO, J. T.	<i>A new class of contact Riemannian manifolds</i>	299
DI PRISCO, C. A. AND S. TODORCEVIC	<i>A cardinal defined by a polarized partition relation</i>	41
DIXON, M. R., M. J. EVANS AND H. SMITH	<i>A Tits alternative for groups that are residually of bounded rank</i>	53
DOW, A. AND K. P. HART	ω^* has (almost) no continuous images	29
EINSTEIN-MATTHEWS, S. M. AND C. H. LUTTERODT	<i>Growth of transcendental entire functions on algebraic varieties</i>	253
EVANS, M. J.	See M. R. DIXON	
FUERTES, Y.	<i>Some bounds for the number of coincidences of morphisms between closed Riemann surfaces</i>	1
HAMACHI, T.	Correction to "Suborbits and group extensions of flows", <i>Israel Journal of Mathematics</i> , Vol. 100, 1997, pp. 249–283	379
HART, K. P.	See A. DOW	
ILANI, I.	<i>Zeta functions related to the group $SL_2(\mathbb{Z}_p)$</i>	157
JUNKER, M.	<i>Completeness in Zariski groups</i>	273
KRAMER, L., K. TENT AND H. VAN MALDEGHEM	<i>Simple groups of finite Morley rank and Tits buildings</i>	189
LE BORGNE, S.	<i>Limit theorems for non-hyperbolic automorphisms of the torus</i>	61
LUTTERODT, C. H.	See S. M. EINSTEIN-MATTHEWS	
MANKIEWICZ, P.	<i>Compact groups of operators on proportional quotients of l_1^n</i>	75
MÜLLER, P.	<i>Hilbert's irreducibility theorem for prime degree and general polynomials</i>	319
ODELL, E.	See G. ANDROULAKIS	
PERETZ, R.	<i>Applications of induced resultants to polynomial maps</i>	181

ROCKMORE, D. N., K.-S. TAN AND R. BEALS	<i>Deciding finiteness for matrix groups over function fields</i>	93
RONAN, M. A. AND J. TITS	<i>Twin trees II: Local structure and a universal construction</i>	349
SMITH, H.	See M. R. DIXON	
TAN, K.-S.	See D. N. ROCKMORE	
TENT, K.	See L. KRAMER	
TIEP, P. H.	<i>Globally irreducible representations of $SL_3(q)$ and $SU_3(q)$</i>	225
TITS, J.	See M. A. RONAN	
TODORCEVIC, S.	See C. A. DI PRISCO	
VAN MALDEGHEM, H.	See L. KRAMER	
VERSHIK, A. AND O. ZEITOUNI	<i>Large deviations in the geometry of convex lattice polygons</i>	13
WATSON, T. C.	<i>An improved characterization of normal sets and some counter-examples</i>	173
WEIDNER, M.	<i>Augmentation-filtration and normal distribution</i>	117
ZEITOUNI, O.	See A. VERSHIK
