ISRAEL JOURNAL OF MATHEMATICS

TABLE OF CONTENTS, VOLUME 152, 2006

Abraham, U., I. Gorelic and I. Juhász *On Jakovlev spaces* 205

Babson, E. and D. N. Kozlov *Complexes of graph homomorphisms* 285

Chatterjee, P. and D. W. Morris *Divergent torus orbits in homogeneous spaces of $\mathbb{Q}$-rank two* 229

Cheung, Y. and H. Masur *A divergent Teichmüller geodesic with uniquely ergodic vertical foliation* 1

Cutillas Ripoll, P. *On infinite products of functions in compact Riemann surfaces* 349

Defant, A. and L. Frerick *A logarithmic lower bound for multi-dimensional Bohr radii* 17

Farb, B. and G. C. Hruska *Commensurability invariants for non-uniform tree lattices* 125

Ferenczi, V. and E. M. Galego *Some equivalence relations which are Borel reducible to isomorphism between separable Banach spaces* 61

Frerick, L. *See* A. Defant

Galego, E. M. *See* V. Ferenczi

Gorelic, I. *See* U. Abraham

Hruska, G. C. *See* B. Farb

Juhász, I. *See* U. Abraham

Konyagin, S. and I. Łaba *Distance sets of well-distributed planar sets for polygonal norms* 157

Koslov, D. N. *See* E. Babson

Krushkal, S. and R. Kühnau *Grunsky inequalities and quasiconformal extension* 49

Kühnau, R. *See* S. Krushkal

Kulagin, V. *Classification of cocycles of generic equivalence relations* 83

Łaba, I. *See* S. Konyagin

Marcus, M. and L. Véron *Maximal solutions of semilinear elliptic equations with locally integrable forcing term* 333

Masur, H. *See* Y. Cheung

Maucourant, F. *Dynamical Borel–Cantelli lemma for hyperbolic spaces* 143

Morris, D. W. *See* P. Chatterjee

Muchnik, R. *A note on stationarity of spherical measures* 271

Neeman, I. *Unraveling Π^1_1 sets, revisited* 181

Rödl, V., M. Schacht, E. Tengan and N. Tokushige *Density theorems and extremal hypergraph problems* 371

Schacht, M. *See* V. Rödl

Shelah, S. and A. Usvyatsov *Banach spaces and groups—Order properties and universal models* 245

Silver, D. S. and S. G. Williams *Lifting representations of $\mathbb{Z}$-groups* 313

Sodin, M. and B. Tsirelson *Random complex zeroes, II. Perturbed lattice* 105

Tengan, E. *See* V. Rödl

Tokushige, N. *See* V. Rödl

Tsirelson, B. *See* M. Sodin

Usvyatsov, A. *See* S. Shelah

Véron, L. *See* M. Marcus

Weiss, B. *Divergent trajectories and $\mathbb{Q}$-rank* 221

Williams, S. G. *See* D. S. Silver

Zapletal, J. *Proper forcing and rectangular Ramsey theorems* 29
