ISRAEL JOURNAL OF MATHEMATICS

TABLE OF CONTENTS, VOLUME 196, 2013

Adamaszek, M. *Clique complexes and graph powers* 295

Almeida, J. and A. Costa *Presentations of Schützenberger groups of minimal subshifts* 1

Andrews, U. and T. Makuluni *The index set of uncountably categorical theories* 491

Barthelmé, T. *A natural Finsler–Laplace operator* 375

Benanti, F. *On the exponential growth of graded Capelli polynomials* 51

Bergen, J., D. Riley and H. Usefi *Lie superalgebras whose enveloping algebras satisfy a non-matrix polynomial identity* 161

Braun, B., J. Browder and S. Klee *Cellular resolutions of ideals defined by nondegenerate simplicial homomorphisms* 321

Browder, J. See B. Braun

Costa, A. See J. Almeida

Dzhafarov, D. D. and C. Mummert *On the strength of the finite intersection principle* 345

Gallardo-Gutiérrez, E. A. and J. R. Partington *Norms of composition operators on weighted Hardy spaces* 273

Ganchev, G. and V. Milousheva *Timelike surfaces with zero mean curvature in Minkowski 4-space* 413

Ginzburg, V. L. and D. Hein *The Arnold conjecture for Clifford symplectic pencils* 95

González-Avilés, C. D. *Abelian class groups of reductive group schemes* 175

Gurel-Gurevich, O. and R. Peled *Poisson thickening* 215

Hein, D. See V. L. Ginzburg

Jorgensen, P. E. T. and E. P. J. Pearse *A discrete Gauss–Green identity for unbounded Laplace operators, and the transience of random walks* 113

Klee, S. See B. Braun

Komjáth, P. *A note on chromatic number and connectivity of infinite graphs* 499

Komjáth, P. *The list-chromatic number of infinite graphs* 67

Makuluni, T. See U. Andrews

Matsumoto, K. *A certain synchronizing property of subshifts and flow equivalence* 235

Milousheva, V. See G. Ganchev

Mummert, C. See D. D. Dzhafarov

Nitzan, N. and M. A. Perles *Radon stability* 483

Partington, J. R. See E. A. Gallardo-Gutiérrez

Pearse, E. P. J. See P. E. T. Jorgensen

Peled, R. See O. Gurel-Gurevich

Perles, M. A. See N. Nitzan

Riley, D. See J. Bergen

Roy, R. and P. Schmid *Steinitz classes for Galois extensions of Dedekind rings* 285

Salehi Golsefidy, A. *Lattices of minimum covolume are non-uniform* 363

Schmid, P. See R. Roy

Speight, G. *Surfaces meeting porous sets in positive measure* 435

Sznajdman, J. *A residue calculus approach to the uniform Artin–Rees lemma* 33

Usefi, H. See J. Bergen

Wang, Yu *Lie superhomomorphisms on Lie ideals in superalgebras* 461

Ye, S. *Erratum to "A unified approach to the plus-construction, Bousfield localization, Moore spaces and zero-in-the-spectrum examples"* 507
