ISRAEL JOURNAL OF MATHEMATICS

TABLE OF CONTENTS, VOLUME 215, 2016

Adams, T. M. and C. E. Silva *Reprint of "Weak rational ergodicity does not imply rational ergodicity", Israel Journal of Mathematics* **214** *(2016), 491–505* 1027

Alfonseca, M. A., M. Cordier and D. Ryabogin *On bodies with directly congruent projections and sections* 765

Bailey, A., M. Finn-Sell and R. Snocken *Subsemigroup, ideal and congruence growth of free semigroups* 459

Barbatis, G. and P. D. Lamberti *Monotonicity, continuity and differentiability results for the L^p Hardy constant* 1011

Bourgain, J. *A Quantitative Oppenheim theorem for generic diagonal quadratic forms* 503

Bradford, H. *Expansion, random walks and sieving in $SL_2(\ _p[t])$* 559

Broderick, R., V. Cyr and B. Kra *Complexity and directional entropy in two dimensions* 135

Cannon, J., M. Garonzi, D. Levy, A. Maróti and I. I. Simion *Groups equal to a product of three conjugate subgroups* 31

Caranti, A. *Erratum to "A module-theoretic approach to abelian automorphism groups", Israel Journal of Mathematics* ***205*** *(2015), 235–246* 1025

Casolo, C., S. Dolfi, E. Pacifici and L. Sanus *Groups whose character degree graph has diameter three* 523

Chandgotia, N. and T. Meyerovitch *Markov random fields, Markov cocycles and the 3-colored chessboard* 909

Chen, H. and C. Xi *Dominant dimensions, derived equivalences and tilting modules* 349

Cohen, M. P. and R. R. Kallman *Openly Haar null sets and conjugacy in Polish groups* 1

Cordier, M. See M. A. Alfonseca

Csikvári, P. *Matchings in vertex-transitive bipartite graphs* 99

Cyr, V. See R. Broderick

Doležal, N., D. Priess and M. Zelený *Infinite games and σ-porosity* 441

Dolfi, S. See C. Casolo

Eleftherakis, G. K., R. H. Levene and I. G. Todorov *Schur idempotents and hyperreflexivity* 317

Finn-Sell, M. See A. Bailey

Garonzi, M. See J. Cannon

Herbin, E. and A. Richard *Local Hölder regularity for set-indexed processes* 397

Ibarlucía, T. *The dynamical hierarchy for Roelcke precompact Polish groups* 965

Iovanov, M. C., Z. Mesyan and M. L. Reyes *Infinite-dimensional diagonalization and semisimplicity* 801

Juhász, I., L. Soukup and Z. Szentmiklóssy *Pinning down versus density* 583

Kakariadis, E. T.A. *A note on the gauge invariant uniqueness theorem for C*-correspondences* 513

Kallman, R. R. See M. P. Cohen

Kra, B. See R. Broderick

Lamberti, P. D. See G. Barbatis

Levene, R. H. See G. K. Eleftherakis

Levy, D. See J. Cannon

Lewis, M. L. *Variations on average character degrees and p-nilpotence* 749

Maróti, A. See J. Cannon

Mesyan, Z. See M. C. Iovanov

Meyerovitch, T. See N. Chandgotia

Nielsen, P. P. *The behavior of ascending chain conditions on submodules of bounded finite generation in direct sums* 339

Priess, D. See M. Doležal

Pacifici, E. See C. Casolo

Ran, Z. *Structure of the cycle map for Hilbert schemes of families of nodal curves* 669

Reyes, M. L. See M. C. Iovanov

Richard, A. See E. Herbin

Rosso, G. *Derivative at $s = 1$ of the p-adic L-function of the symmetric square of a Hilbert modular form* 255

Ryabogin, D. See M. A. Alfonseca

Saghin, R. and J. Yang *Continuity of topological entropy for perturbation of time-one maps of hyperbolic flows* 857

Sanus, L. See C. Casolo

Silva, C. E. See T. M. Adams

Simion, I. I. See J. Cannon

Skrypnik, I. I. *Removability of isolated singularities for anisotropic elliptic equations with gradient absorption* 163

Snocken, R. See A. Bailey
Soukup, L. See I. Juhász
Szentmiklóssy, Z. See I. Juhász
Thomine, D. *Local time and first return time for periodic semi-flows* 53
Todorov, I. G. See G. K. Eleftherakis
Topaz, A. *Abelian-by-central Galois groups of fields II: definability of inertia/decomposition groups* 713
Trang, N. *PFA and guessing models* 607
Xi, C. See H. Chen
Yang, J. See R. Saghin
Zelený M. See M. Doležal
Zhao, L. *Rational lines on cubic hypersurfaces* 877
Zhu, J. *Gluing formula of real analytic torsion forms and adiabatic limit* 181
