

## ISRAEL JOURNAL OF MATHEMATICS

## TABLE OF CONTENTS, VOLUME 96, 1996

AGNARSSON, G., S. A. AMITSUR AND J. C. ROBSON <i>Recognition of matrix rings II</i>	1
AMITSUR, S. A. <i>See G. AGNARSSON</i>	
AMITSUR, S. A. AND D. BAUM <i>Finite-dimensional subalgebras of division rings</i>	15
AMITSUR, S. A. AND L. W. SMALL <i>Algebras over infinite fields, revisited</i>	23
BAHTURIN, Y., D. FISCHMAN AND S. MONTGOMERY <i>On the generalized Lie structure of associative algebras</i>	27
BAUM, D. <i>See S. A. AMITSUR</i>	
BERELE, A., A. GIAMBRUNO AND A. REGEV <i>Involution codimensions and trace codimensions of matrices are asymptotically equal</i>	49
BERGMAN, G. M. <i>On the growth of algebras with bialgebra action</i>	63
BOKUT', L. AND P. MALCOLMSON <i>Gröbner–Shirshov bases for quantum enveloping algebras</i>	97
BRAUN, A. <i>Localization, completion and the AR property in Noetherian P.I. rings</i>	115
BRUSSEL, E. S. <i>Decomposability and embeddability of discretely Henselian division algebras</i>	141
COHEN, M., S. WESTREICH AND S. ZHU <i>Determinants, integrality and Noether's theorem for quantum commutative algebras</i>	185
COHN, P. M. <i>On skew field coproducts with a finite extension</i>	223
DRENSKY, V. AND A. REGEV <i>Exact asymptotic behaviour on the codimensions of some P.I. algebras</i>	231
FEIN, B. AND M. SCHACHER <i>Sums of corestrictions of cyclic algebras</i>	243
FISCHMAN, D. <i>See Y. BAHTURIN</i>	
FORD, T. J. <i>The Brauer group of a curve over a strictly local discrete valuation ring</i>	259
FRUMKIN, A. <i>The irreducible characters of the Lie superalgebras of type <math>A(n, m)</math> and filtrations of their Kac modules</i>	267
GIAMBRUNO, A. AND A. VALENTI <i>Central polynomials and matrix invariants</i>	281
GIAMBRUNO, A. <i>See A. BERELE</i>	

HAILE, D. E., M-A. KNUS, M. ROST AND J-P. TIGNOL <i>Algebras of odd degree with involution, trace forms and dihedral extensions</i>	299
KELLER, J. See V. K. KHARCHENKO	
KEMER, A. <i>Remarks on the prime varieties</i>	341
KHARCHENKO, V. K., J. KELLER AND S. RODRÍGUES-ROMO <i>Prime rings with PI rings of constants</i>	357
KNUS, M-A. See D. E. HAILE	
LAM, T. Y. AND A. LEROY <i>Recognition and computations of matrix rings</i>	379
LEROY, A. See T. Y. LAM	
LUBOTZKY, A., L. PYBER AND A. SHALEV <i>Discrete groups of slow subgroup growth</i>	399
MAKAR-LIMANOV, L. <i>On the hypersurface <math>x + x^2y + z^2 + t^3 = 0</math> in <math>\mathbb{C}^4</math> or a <math>\mathbb{C}^3</math>-like threefold which is not <math>\mathbb{C}^3</math></i>	419
MALCOLMSON, P. See L. BOKUT'	
MALLE, G. AND J. SONN <i>Covering groups of almost simple groups as Galois groups over <math>\mathbb{Q}^{\text{ab}}(t)</math></i>	431
MANN, A. <i>Shimshon Avraham Amitsur (1921–1994)</i>	ix
MANN, A. <i>Philip Hall's 'rather curious' formula for abelian <math>p</math>-groups</i>	445
MANN, A. AND A. SHALEV <i>Simple groups, maximal subgroups, and probabilistic aspects of profinite groups</i>	449
MARTINEZ, C. AND E. ZELMANOV <i>Products of powers in finite simple groups</i>	469
MONTGOMERY, S. See Y. BAHTURIN	
PASSMAN, D. S. <i>The semiprimitivity problem for group algebras of locally finite groups</i>	481
PLOTKIN, B. <i>Varieties of algebras and algebraic varieties</i>	511
PYBER, L. See A. LUBOTZKY	
REGEV, A. See A. BERELE	
REGEV, A. See V. DRENSKY	
E. RIPS <i>On a double of a free group</i>	523
ROBSON, J. C. See G. AGNARSSON	
RODRÍGUES-ROMO, S. See V. K. KHARCHENKO	
ROST, M. See D. E. HAILE	
ROWEN, L. H. AND D. J. SALTMAN <i>Semidirect product division algebras</i>	527
ROWEN, L. H. AND J-P. TIGNOL <i>On the decomposition of cyclic algebras</i>	553
SALTMAN, D. J. See L. H. ROWEN	
SCHACHER, M. See B. FEIN	
SHALEV, A. See A. LUBOTZKY	
SHALEV, A. See A. MANN	
SMALL, L. W. See S. A. AMITSUR	

SONN, J. See G. MALLE  
TIGNOL, J-P. See D. E. HAILE  
TIGNOL, J-P. See L. H. ROWEN  
VALENTI, A. See A. GIAMBRUNO  
VAN OYSTAEYEN, F. AND Y.H.ZHANG *The crossed coproduct  
theorem and Galois cohomology* 579  
WESTREICH, S. See M. COHEN  
ZALESSKI, A. E. *Modular group rings of the finitary symmetric group* 609  
ZELMANOV, E. See C. MARTINEZ  
ZHANG, Y. H. See F. VAN OYSTAEYEN  
ZHU, S. See M. COHEN
