ISRAEL JOURNAL OF MATHEMATICS

TABLE OF CONTENTS, VOLUME 173, 2009

Banks, W. D. and I. E. Shparlinski *Sato–Tate, cyclicity, and divisibility statistics on average for elliptic curves of small height* 253

Ben Yaacov, I. *Continuous and random Vapnik–Chervonenkis classes* 309

Boutet de Monvel, A., D. Lenz and P. Stollmann *Sch'nol's theorem for strongly local forms* 189

Cohen, A. M., B. Frenk and D. B. Wales *Brauer algebras of simply laced type* 335

Collins, D. J. and A. Juhasz *The geometry of the consequences of a single Engel relator* 125

Dahmani, F. *Existential questions in (relatively) hyperbolic groups* 91

Frenk, B. See A. M. Cohen

Hamada, H., T. Honda and G. Kohr *Bohr's theorem for holomorphic mappings with values in homogeneous balls* 177

Honda, T. See H. Hamada

Juhasz, A. See D. J. Collins

del Junco, A. and A. Şahin *Dye's theorem in the almost continuous category* 235

Kochloukova, D. H. and A. G. S. Pinto *Finiteness conditions on subgroups of profinite p-Poincaré duality groups* 367

Kohr, G. See H. Hamada

Kojman, M. *A symmetrized metric Ramsey theorem* 305

Lenz, D. See A. Boutet de Monvel

Morbidelli, D. *Liouville theorem, conformally invariant cones and umbilical surfaces for Grushin-type metrics* 379

Pinto, A. G. S. See D. H. Kochloukova

Rubin, B. *The Lower Dimensional Busemann-Petty problem for bodies with the generalized axial symmetry* 213

Şahin, A. See A. del Junco

Samet, I. *Rigid actions of amenable groups* 61

Schippers, E. and W. Staubach *Variation of Neumann and Green functions under homotopies of the boundary* 279

Shelah, S. *Dependent first order theories, continued* 1

Shparlinski, I. E. See W. D. Banks

SPURNÝ, J. *On the Dirichlet problem of extreme points for non-continuous functions* 403

STAUBACH, W. See E. SCHIPPERS

STOLLMANN, P. See A. BOUTET DE MONVEL

URBAN, R. AND J. ZIENKIEWICZ *Dimension free estimates for Riesz transforms of some Schrödinger operators* 157

WALES, D. B. See A. M. COHEN

ZIENKIEWICZ, J. See R. URBAN

ZWEIMÜLLER, R. *Measure preserving transformations similar to Markov shifts* 421
